GE and conventional corn and soy produced (MMT) by selected countries 2012 – hatch marked slices represent GE, solid are conventional

CORN

SOYBEANS

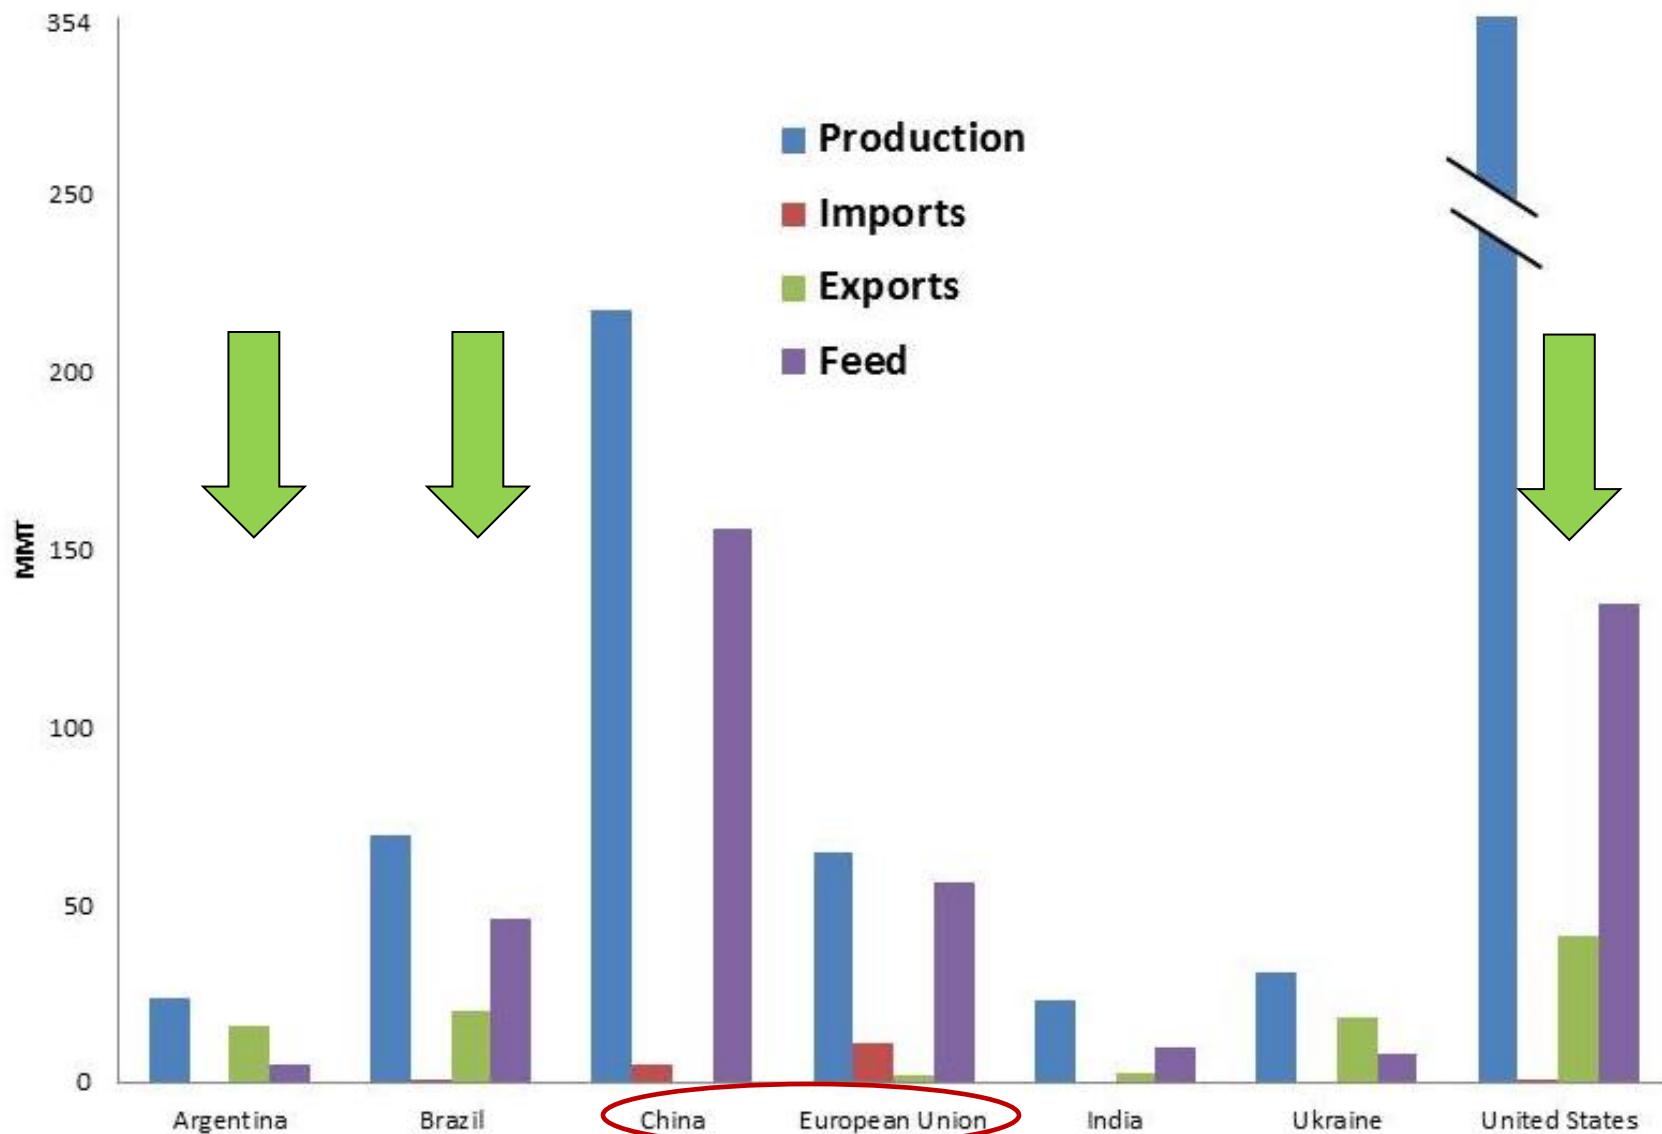

35% (55.1 million hectares) of the 159 million hectares of the corn planted globally were GE

81% (80.7 million hectares) of the 100 million hectares of the soybean planted globally were GE

Corn Production

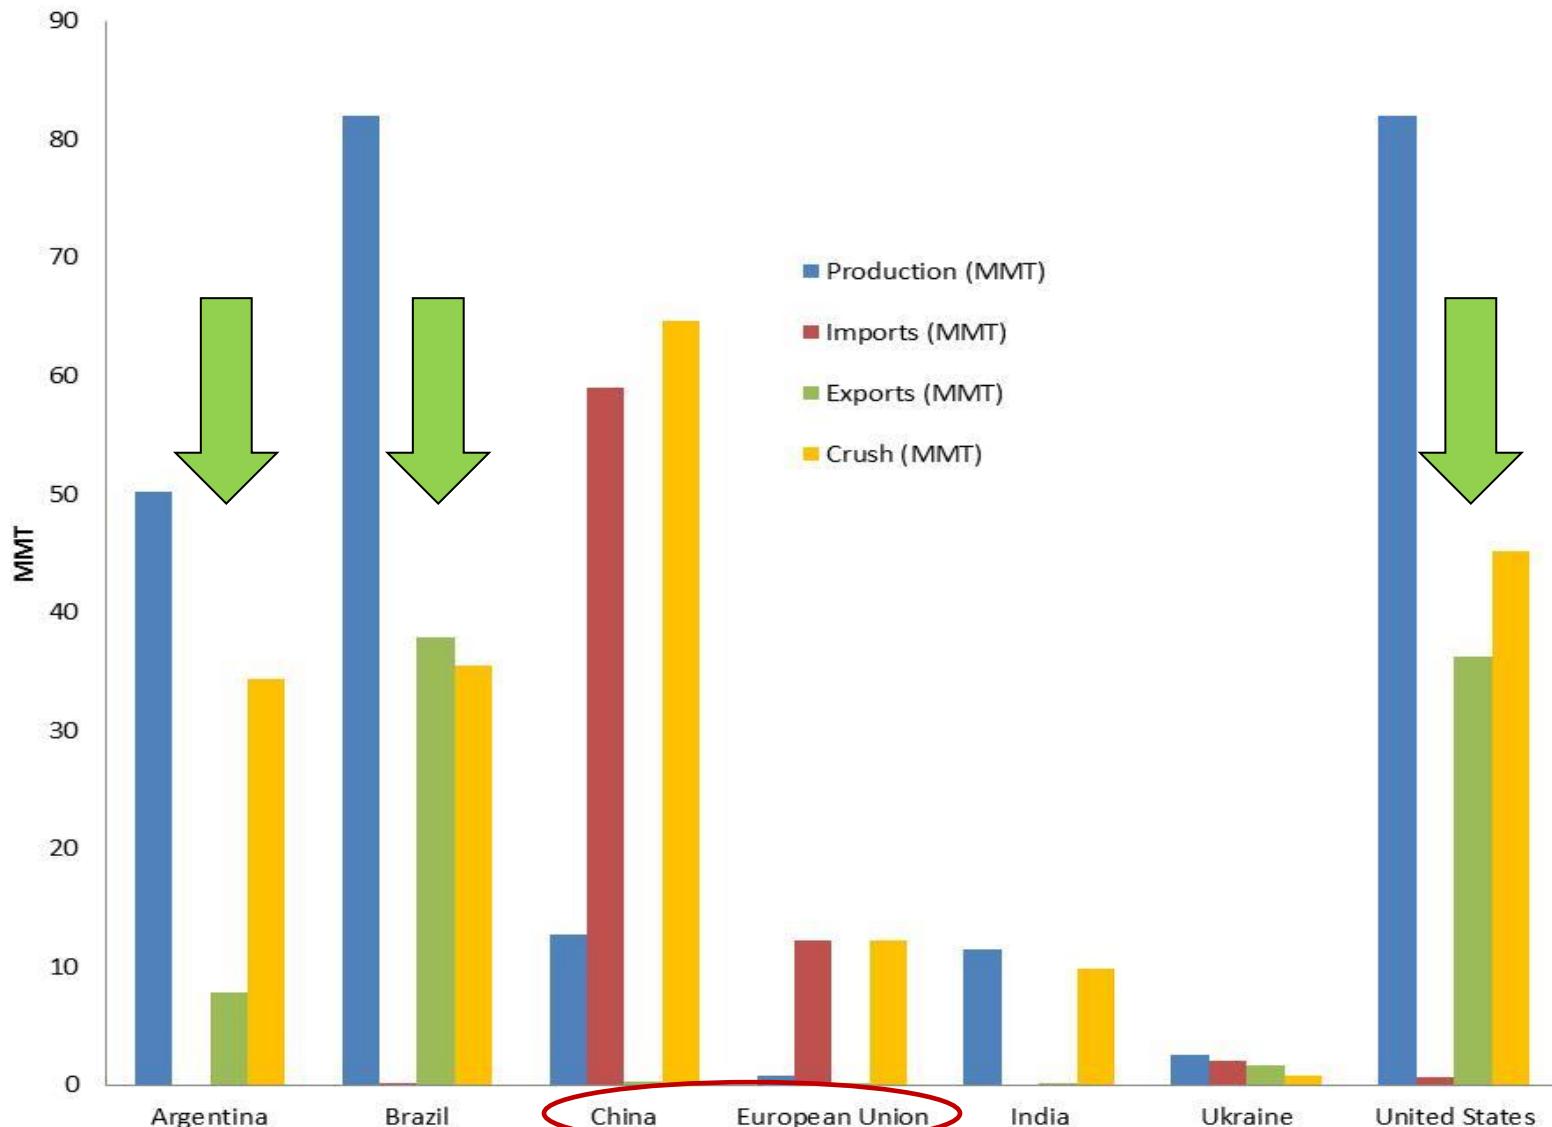

Production, Imports, Export, Feed by Country 2013

Soybean Production

Imports, Exports and Crush by Country 2013

The majority of the more than 100 billion food animals raised in the US between 2000-2011 consumed varying levels of GE feed.

Industry ^a	U.S. ^b
Broiler	105,426,000,000
Beef cattle	410,000,000
Dairy Cows	35,000,000
Hogs	105,000,000
Total	105,976,000,000

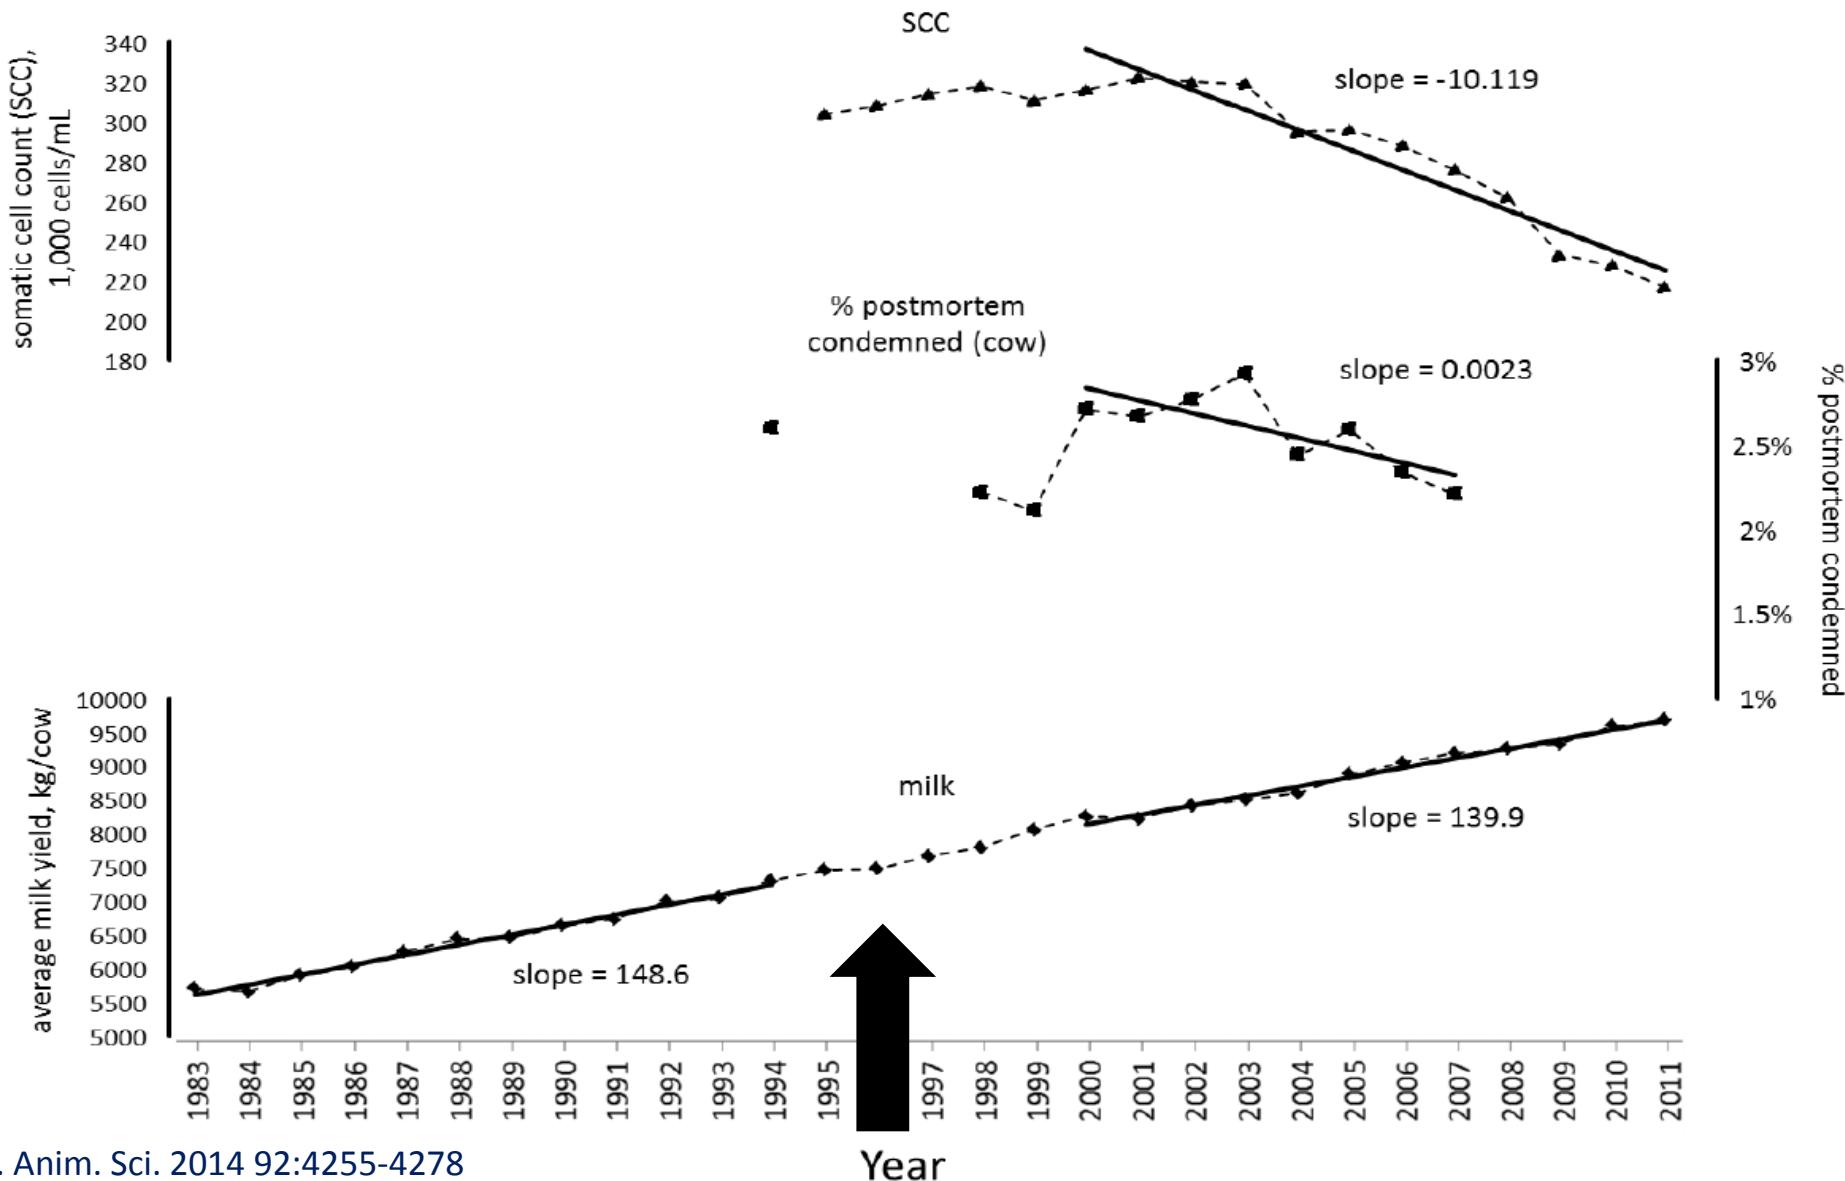

^a Numbers for broilers, hogs (barrows and gilts) and beef cattle (steers) are for slaughtered animals during calendar year. Dairy animals are number of dairy cows in a calendar year divided by three to account for three lactations per animal.

Van Eenennaam, A. L., and A. E. Young. 2014. Prevalence and impacts of genetically engineered feedstuffs on livestock populations J. Anim. Sci. 92:4255-4278

Milk production, percent post-mortem condemned, and somatic cell counts for the United States before and after the introduction of genetically engineered crops in 1996.

Production statistics for US broilers prior to and subsequent to the introduction of GM crops in 1996. Slopes differ between time periods 1983-1994 and 2000-2011 (*P < 0.05).

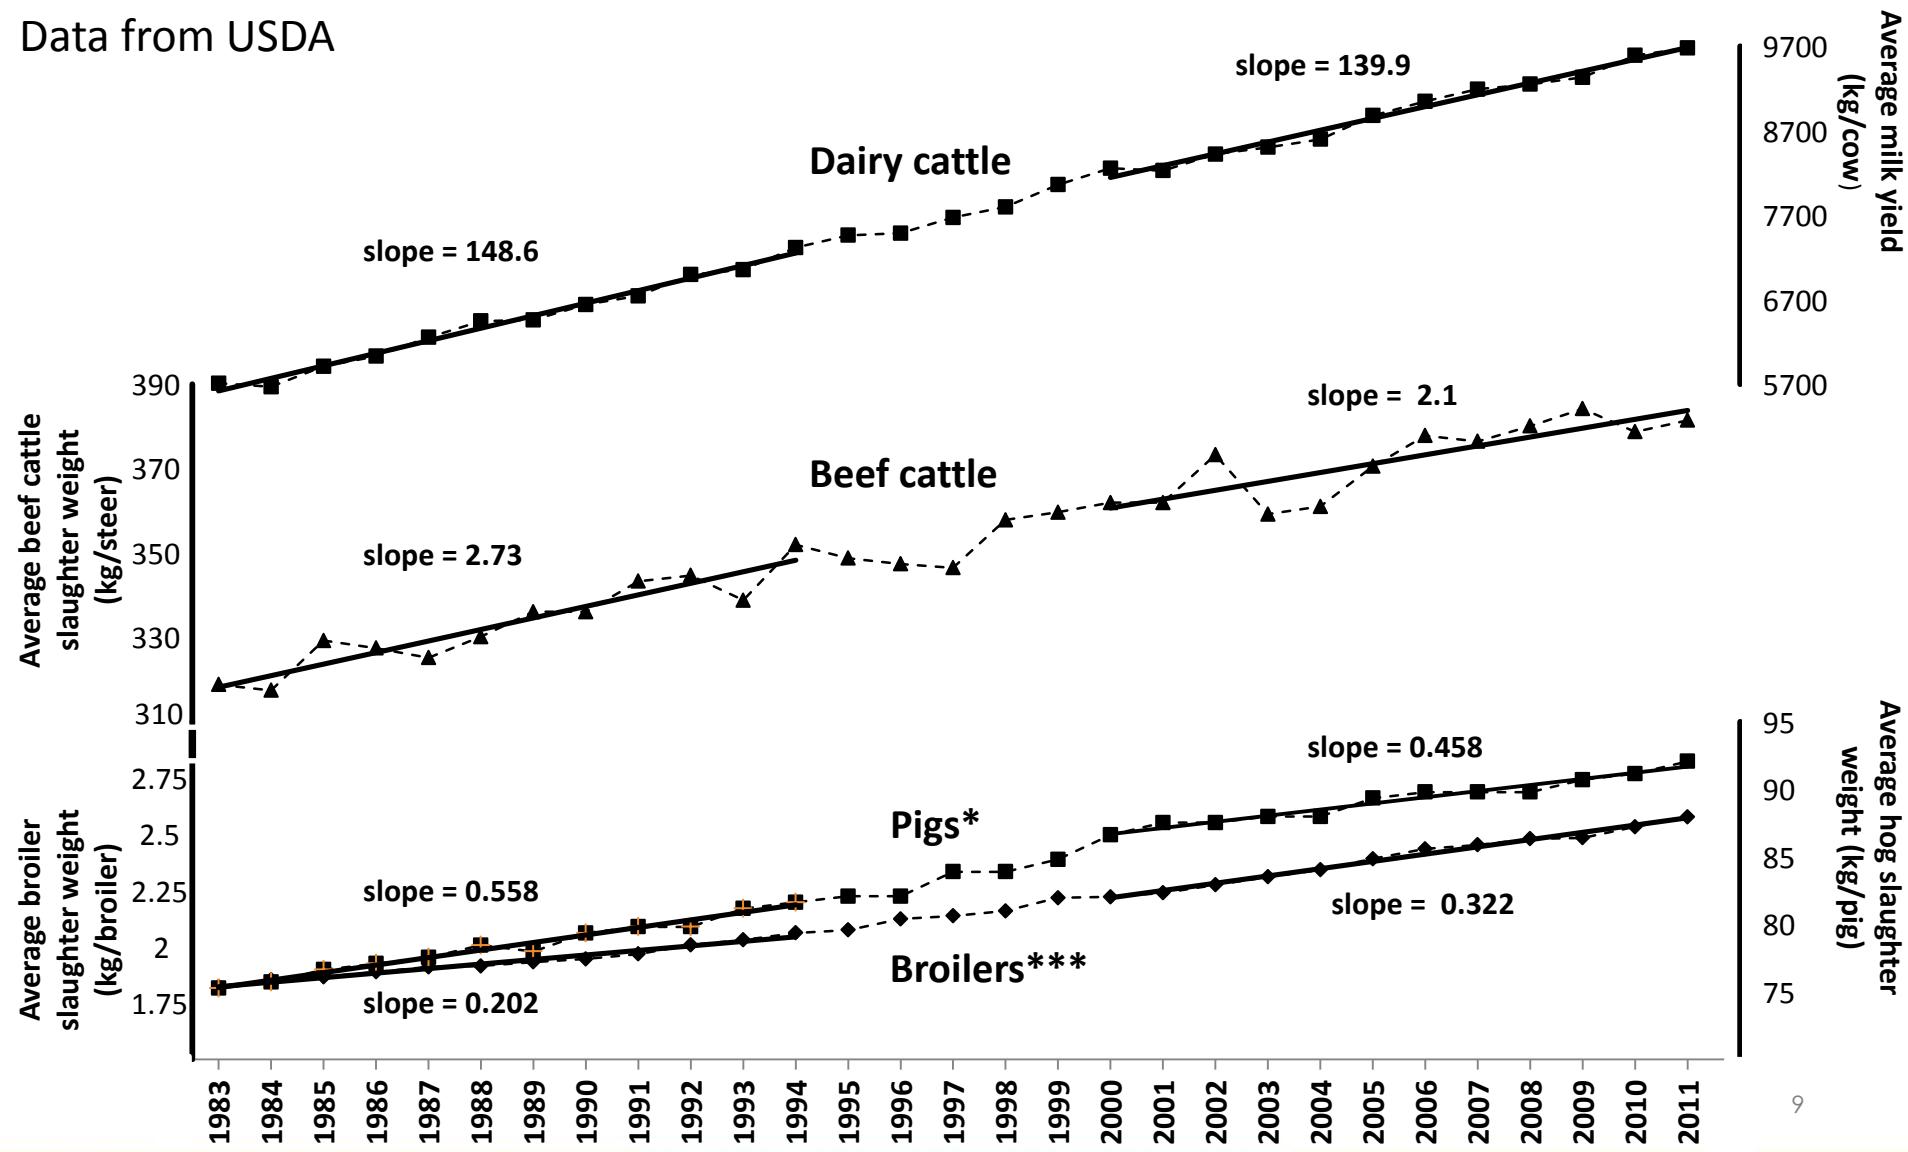

Anti-mortem and Post-mortem condemnation rates for US Swine 2000-2013 (subsequent to the introduction of GM crops in 1996).

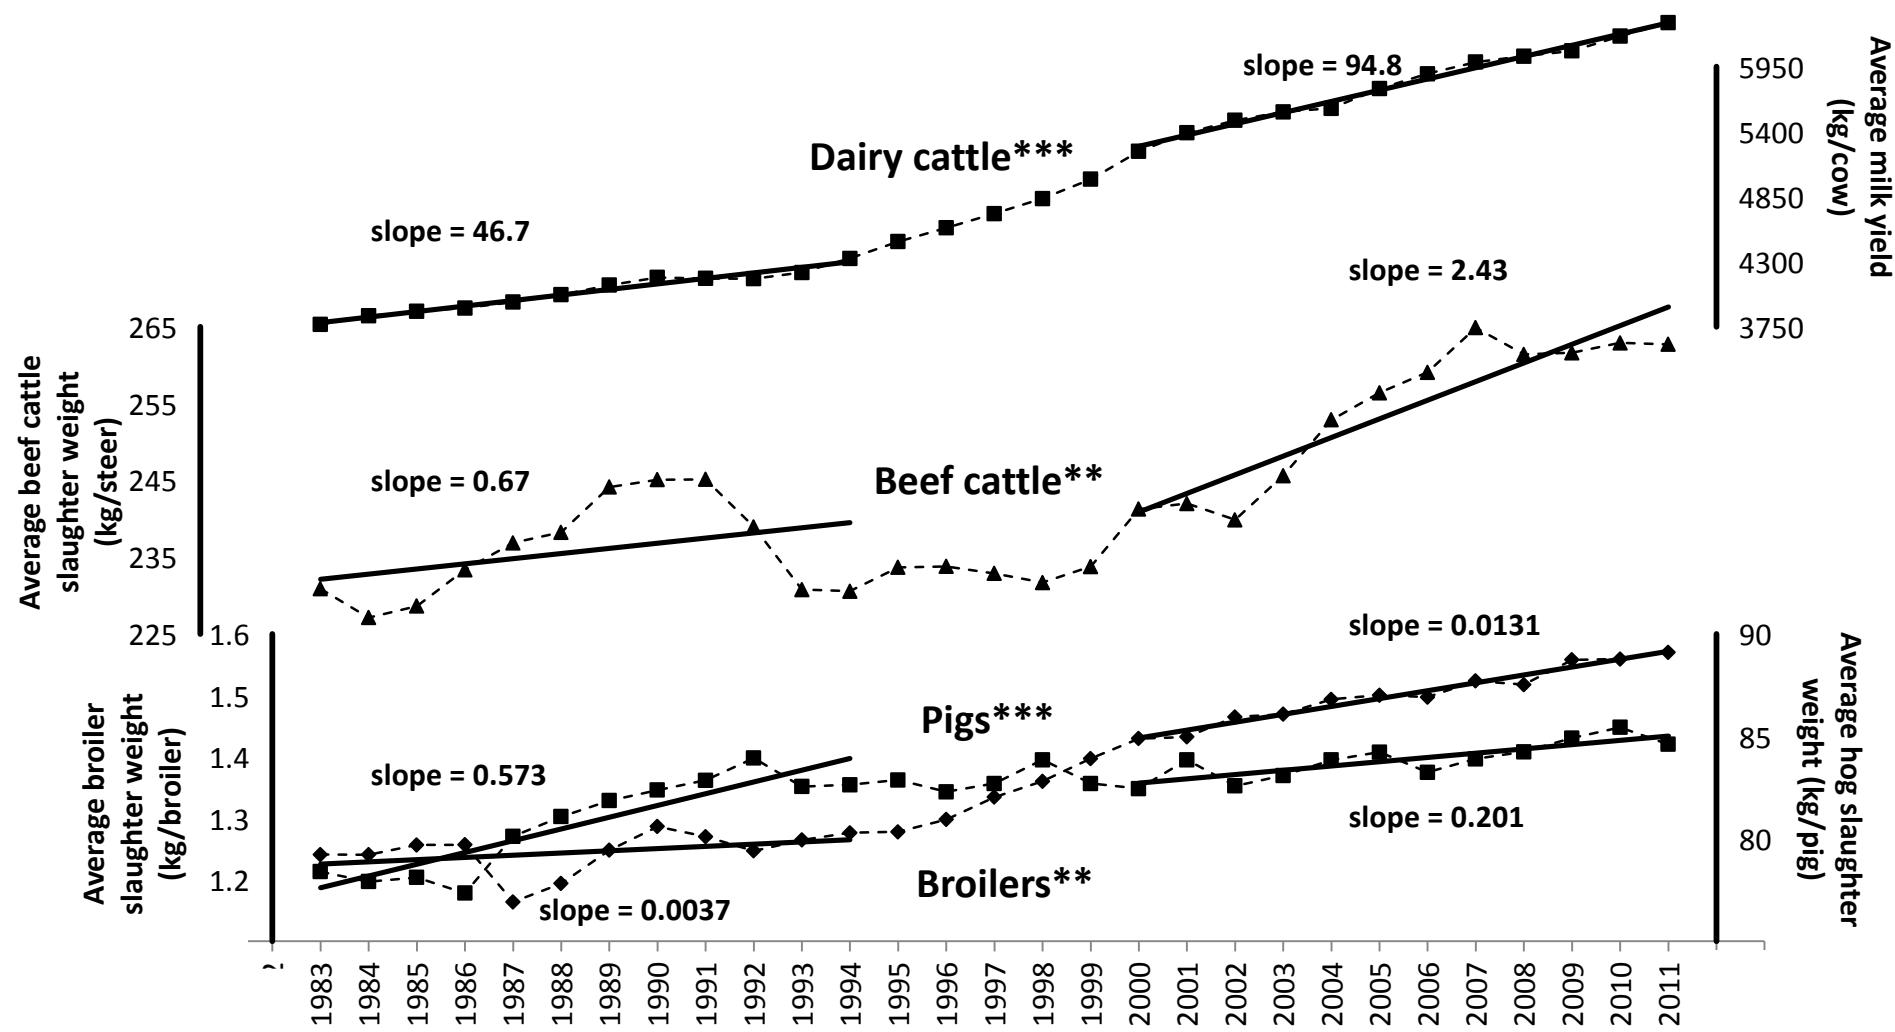

Livestock production statistics for the US prior to and subsequent to the introduction of GM crops in 1996. Slopes differ between time periods 1983-1994 and 2000-2011 (*P < 0.05; **P < 0.01; ***P < 0.001).

Data from USDA

Livestock production statistics for the EU prior to and subsequent to the introduction of GM crops in 1996. Slopes differ between time periods 1983-1994 and 2000-2011 (*P < 0.05; **P < 0.01; ***P < 0.001).

EU data were from FAOSTAT6 and data were summarized for the EU-27 countries.

Year	EU-27 Data				United States Data													
	Milk Yield (kg)	Carcass wt. (kg) broiler	Carcass wt. (kg) hog	Carcass wt. (kg) cattle	Milk Yield (kg)	Carcass wt. (kg) broiler	Carcass wt. (kg) hog	Carcass wt. (kg) cattle	Broiler				Cattle Condemned Post-Mortem (%)				Pigs Condemned (%)	
									Post-M Condemned (%)	Market age, d	Mortality (%)	Feed to Gain ratio	Fed cattle		Non-fed cattle			
													Steers	Heifers	Cows	Bulls	Ante-M	Post-M
